

## NovaCrypt Summer Internship:

Congratulations on being selected for NovaCrypt's summer internship! This internship will be focused on technology projects and will last for 6 weeks. During this time, you will be responsible for weekly check-ins and your project's overall development and progress.

You will initially choose a project of interest. This project must be of adequate difficulty while also adhering to Novacrypt guidelines. Once the project is approved, the first week will be dedicated to research and preliminary matters before development can start. After this, you will progress in the project at your own pace. A weekly check-in, every **Wednesday**, will be required on the progress of your project. This will include a short paragraph that will be recorded about your progress and any problems you currently face in your project. You must not miss this check-in. Any questions can be asked and will be answered on a timely basis. Also, only ask a question if you have thoroughly researched and exhausted all options. Thank you, and we look forward to seeing what you can create.

The official start date is 6/30/23 , and your projects should conclude on 8/4/23

NovaCrypt bears no legal or financial responsibility for projects created during this program. However, we ask that as you consider your project proposals, keep in mind the limits of laws and ethics. NovaCrypt will not put their name behind anything deemed illegal, unethical, or harmful, nor does it condone any discrimination or behaviors that cause harm or discomfort to others. NovaCrypt is a nonprofit dedicated to connecting students to opportunities in STEM fields and careers and will not condone any behavior contrary to its mission.
